

From Evaluation to Tools to Implementation: Assistive Technology

a cost-effective, educationally sound seminar for prescribing appropriate technology tools for struggling students

Have you found yourself asking these questions?

- ❖ How can we make our curriculum accessible to ALL of our students?
- ❖ What are the best technology tools for struggling readers and writers?
- ❖ How can assistive technology tools help the increasing number of mainstreamed special education students meet their educational goals and become independent learners?
- ❖ Are we making the best use of the technology we already have?
- ❖ Are there any free tools available?
- ❖ How do we ensure our legal obligation that every child is entitled to an Assistive Technology evaluation is met?

Attend *From Evaluation to Tools to Implementation* and develop your own assistive technology evaluation team. Meet educational needs before they become problems (due process, lawsuits, missed educational opportunities) and build capacity within your district. Your AT Team will effectively and efficiently assess students with mild to moderate learning disabilities to determine how and if assistive technology can help them. Experiment with a range of assistive technology tools and learn how to match student needs to device features, creating personalized solutions. Make the most of the technology resources you already have. Be a part of the process of helping students achieve educational goals and reaching their full potential.

This 3-Day Seminar is Recommended For:

District teams (Special Education Supervisor, Technology Director, Teacher, Occupational Therapist, Learning Consultant, and Psychologist)

Dates: May 6, 7 and 12, 2010

Time: 9:00 am - 3:00 pm

Fee: \$450 per person, discount for teams of 3 or more

Supporting the use of assistive technology is an approved and desired use of ARRA funds.
